Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-16 and 27-34, drawn to a method and apparatus for treating chemical pulp, classified in class 162, subclass 60.

II. Claims 17-26 and 35-40, drawn to a method and apparatus for treating chemical pulp, classified in class 162, subclass 60.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Inventions I and II are not used together and have different modes of operation. Invention I comprises devices for treating a washing filtrate with an oxidizing chemical prior to use of the filtrate as a washing liquid. Invention II comprises devices to regulate the retention time between the digester blow and the oxygen stage feed. The two inventions achieve the same purpose, namely treating chemical pulp to decrease or prevent reactions between oxygen and organic material present in cooked pulp, but through different means and methodology.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
